Product Release Notes

May 29, 2025

MN v9.8.0

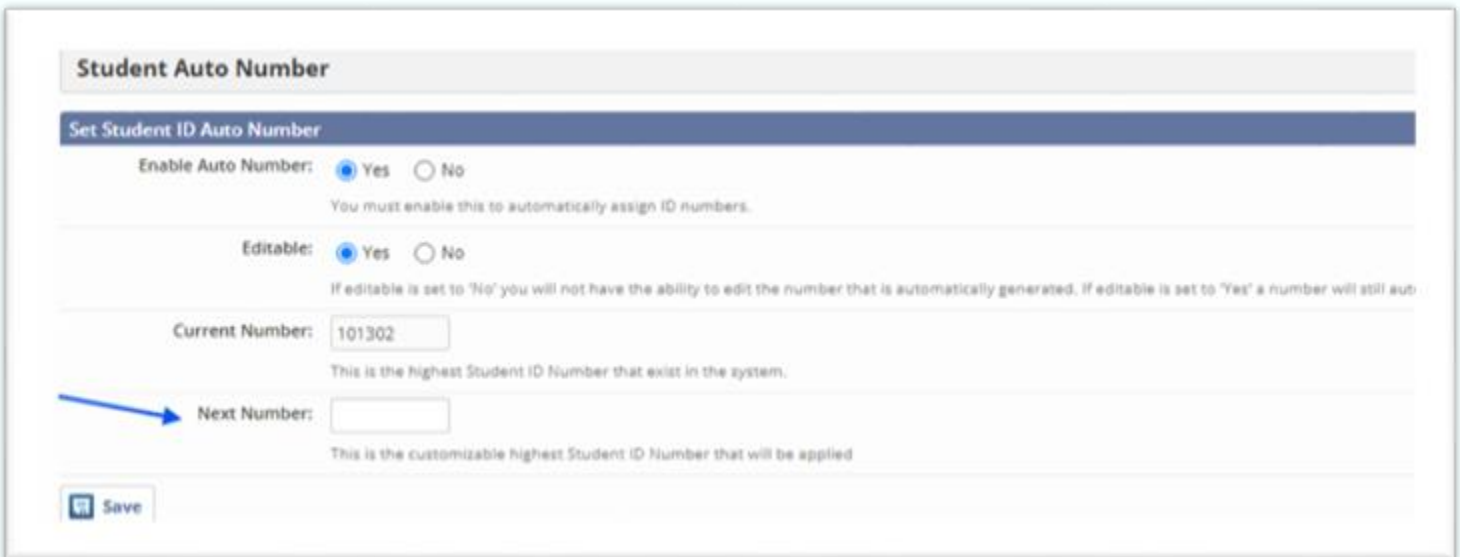

1. Renaissance Learning SFTP Integrations

Renaissance Learning is now a trusted integration partner

- ✦ Users can now send class rosters, staff details, and other relevant information directly from Educate to Renaissance.
- ✦ Once the Renaissance Learning integration is set up data will automatically sync twice daily.

Improvements to Student Auto Numbering (IDs)

- ✦ Admin and District Admin can now customize student auto numbers or IDs to a specific digit in the Setup under Demographics

The screenshot shows a web form titled "Student Auto Number". Below the title is a section "Set Student ID Auto Number" with two radio buttons: "Enable Auto Number:" (Yes selected) and "No". A note states: "You must enable this to automatically assign ID numbers." Below this are two more radio buttons: "Editable:" (Yes selected) and "No". A note states: "If editable is set to 'No' you will not have the ability to edit the number that is automatically generated. If editable is set to 'Yes' a number will still auto". Below this are two input fields: "Current Number:" (101302) and "Next Number:". A blue arrow points to the "Next Number:" field. A note states: "This is the customizable highest Student ID Number that will be applied". At the bottom left is a "Save" button.

2. Result Module Improvements

Generated Time Stamp

- ✦ Admins can now see the time stamp of when a report card was generated, helping analyze if report cards need regenerating after changes have been made.

Classroom Module Time Stamp

- ✦ Teachers can now see the time stamp in the classroom module under the table header “Generated/Released On.”

Accurate Asterisk Indicator in Generate Report Cards

- ✦ Asterisk shows only if there are latest changes not captured in the generated report card for a specific grading period.

Browser Compatibility for Date Picker

- ✦ Removed cache browser suggestions for dates used in the past, allowing direct access to the date picker. Now compatible with major browsers including Chrome, Edge, and Firefox.
